Water & Fire

— Design that flows and warms

In this section, you'll find everything that relates to the noble elements of water or fire: kitchens, appliances, bathrooms, fireplaces and other heating systems. With the emergence of "hiving," a more connected lifestyle trend than cocooning, these spaces and amenities are evolving. Discover the latest innovations to enhance your well-being.

- **The kitchen is queen!** New granite or quartz countertops, stainless steel appliances and range hoods, recessed lighting and more to make the kitchen the central hub of your home.
- **The bathroom has become the water room.** The size of bathrooms has almost tripled in the last 20 years. It's now possible to install a roomy shower area, a freestanding bathtub or a heated floor for maximum comfort.
- **Beautiful sources of soft warmth.** New technologies are constantly being developed to provide comfort and well-being.

"Discover how the latest offerings in the Water & Fire section can bring more harmony and enjoyment to your interior, as well as increase the value of your home."
